Take me out

To Washington,

Take me out

to the polls;

Support some bills

And legislation.

I only care if

they never ever get passed

Let me vote, vote, vote

For the president,

If they don't win

It's a shame;

For it's one, two,

Three strikes they're out

Of the oval office!

Oatmeal is yummy and good for your heart  
Breakfast every day makes for a great start  
Don't drink too much soda, it can make you fat  
Fruit juice instead is better than that  
Apples and grapes, cucumbers and peas  
Yes, I would like some more of these  
Raisins and pears, salad and beans  
Are better than candy if you want to stay lean

I'm happy, I'm feeling good  
I'm eating healthy, like I should  
Fruits and veggies, all day long  
The future, is looking strong

I'm happy, I'm feeling good  
I'm eating healthy, like I should  
Fruits and veggies, all day long  
The future, is looking strong, is looking strong, is looking  
strong, is looking strong

That means it's getting colder  
So bundle up fore you go

When it is cold outside  
These are the things to know

## Reading Songs

Title: Reading  
To the tune of: Handlebars  
By: John Hauer

I can read about almost anything, almost anything, almost anything  
I can read about almost anything, almost anything, almost anything

Look at me, look at me, I read about anything  
I can read stories about knights and dragons, wars and fights, queens and kings  
I can read just for fun  
Or to find how to get things done  
I can read about long ago  
Or how the future world will go  
History books tell what happened in the past  
But times are moving way too fast  
So science books can fill you in  
On what is new in this world we're in  
The library is full of books galore  
You can find anything there and more  
So if you want to learn and be smart  
The library is the place to start

I can read about almost anything, almost anything, almost anything  
I can read about almost anything, almost anything, almost anything

Title: 5 Parts of a Story  
To the tune of: Mary had a Little Lamb  
By: Sarah Rice

Exposition starts a story,  
Starts a story  
Starts a story.  
Exposition starts a story.  
It lets you know what's up.

Rising Action climbs to climax,  
Climbs to climax,  
Climbs to climax.  
Rising Action climbs to climax.  
It slowly rises up.

Climax is the highest point,  
Highest point,  
Highest point.  
Climax is the highest point.  
It's what you don't want to miss.

Falling Action falls from Climax,  
Falls from Climax,  
Falls from Climax.  
Falling Action falls from Climax.  
It falls and spirals down.

Resolution ends the story,  
Ends the story,  
Ends the story.  
Resolution ends the story.  
Story's over: The End.

To the tune of: She'll be Comin' 'Round the Mountain  
By: Tiffany Harms

There are seven elements to the stories that we read  
There are seven elements to the stories that we read  
Every story has a setting  
To set the time and place  
There are seven elements to the stories that we read  
Every story has its characters  
They're the people or the creatures  
There are seven elements to the stories that we read  
Every story has a plot  
Which explains the story's conflict  
The conflict is the problem we perceive  
There is also rising action  
Or events leading to the climax  
There are seven elements to the stories that we read  
The climax is the high point  
The resolution solves the problem  
There are seven elements to the stories that we read

Title: Hurricanes  
To the Tune of: Jingle Bells  
By: Haley Walsh

Hurricane,  
Hurricane,  
Water everywhere.

Spiraling for days and weeks,  
At a high velocity.

Hurricane,

Water everywhere.

When the temperature rises up,  
The storm begins to brew.

States of Matter  
Tune: Frere Jacques

The states of matter (states of matter)

Then there is a solid  
Followed by a liquid  
States of matter, States of matter

Newton's Laws  
Tune: Do Your Ears Hang Low?  
by Kirstin Keller

Do you know Newton's Laws?  
Can you name all three of them?  
So the first one for instance,  
a resting object will always rest  
unless you apply to it  
an external force  
Do you know Newton's Laws?

Do you know Newton's Laws?  
Can you name all three of them?  
Maybe now the second one,  
To find the force of an object  
Always take the mass  
times the acceleration.  
Do you know Newton's Laws?

Do you know Newton's Laws?  
Can you name all three of them?  
The last one is easy  
Just know that every single action  
has an equal reaction  
that is always opposite  
Do you know Newton's Laws?

#### The Water Cycle

Tune: This Land is Your Land  
By: Brittne Brannan

Oh the water cycle is so important  
It brings rain to the plains  
But you need to know that, that there are stages  
To the water cycle  
It goes evaporation, then condensation, and finally  
precipitation  
Now that's the cycle, the water cycle  
It happens everywhere

Title: How to write a story

To the tune of: The Brady Bunch

By: Allie Robitaille

This is how to write a story  
It is easy but there are things you need to learn  
Like what is a setting? Or the climax?  
But it won't take too long

Lets start out with what are characters  
The protagonists are the heros  
And the villains they are called antagonists  
But our stories need both

When you tell the reader location that's setting  
If a fight occurs that is called conflict  
Or if something really big, starts to happen  
That is called climax

Now that is all  
It's time to write  
You have learned all it takes to write a story
